Mind Blowing History

TAMIL NADU

Tamil Nadu: Where History Comes Alive!

Long ago, brave kings, skilled artists, and talented builders lived in Tamil Nadu. They created beautiful temples, forts, and cities that still amaze people today. Even after hundreds of years, many of these places are standing strong!

One of the greatest wonders is the Brihadisvara Temple. It was built over 1,000 years ago by the great Chola king Rajaraja Chola I. The temple is made mostly of granite, even though there were no granite hills nearby. Imagine moving such huge stones without modern machines! The temple's tall tower is about 66 metres high, making it one of the tallest temples in India.

DID YOU KNOW?

The Brihadisvara Temple is over 1,000 years old.

SCIENTIFIC DISCOVERIES

THE SUPER IDEA BORN FROM AN ACCIDENT

In 1968, scientist Dr. Spencer Silver was trying to invent a super-strong adhesive. Instead, he accidentally created a weak, low-tack adhesive that could stick to surfaces but could also be removed easily. At first, it seemed like a complete failure because it wasn't strong enough for its intended purpose.

A lightbulb moment

A few years later Dr Silver's colleague Art fry was singing in a choir. He was frustrated because his paper bookmarks kept falling out. Suddenly, he had an idea: What if he used Dr Silver's 'failed' weak glue on his bookmarks? It would stick without damaging the paper.

The Sticky We Would Know

That simple "discovery" moment changed everything. By combining the weak glue with a new way to use it, they created the **Post - It - Note**.

Today, these colourful little squares are used all over the world for reminders, school notes and creative art.
