EXPLORING TAMILNADU

🌊 Rameswaram – The Island of Wonders

Rameswaram is a beautiful island town in Tamil Nadu, surrounded by the sparkling blue waters of the Palk Strait and Gulf of Mannar. It is a place where history, nature and culture come together.

The famous Ramanathaswamy Temple is one of Rameswaram's greatest attractions.

It is known for its huge corridors, beautifully carved pillars and impressive architecture. The town is also an important pilgrimage centre.

Another amazing landmark is the Pamban Bridge, which connects Rameswaram Island to mainland Tamil Nadu. Standing over the sea, the bridge offers a breathtaking view of the blue waters and passing trains.

Rameswaram is also the birthplace of Dr. A. P. J. Abdul Kalam, the renowned scientist and former President of India. His childhood home has been turned into a museum where visitors can learn about his inspiring life.

Rameswaram is more than just a tourist destination. Its temples, sea, bridges, history and inspiring stories make it a truly special place to explore. 🌊 ✨

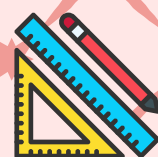

DID YOU KNOW?

🇮🇳 THE HISTORIC PAMBAN RAILWAY BRIDGE WAS INDIA'S FIRST SEA BRIDGE.

FUN FACT

🌴 RAMESWARAM IS SO CLOSE TO SRI LANKA THAT THE TWO COUNTRIES ARE SEPARATED BY ONLY A RELATIVELY NARROW STRETCH OF SEA.

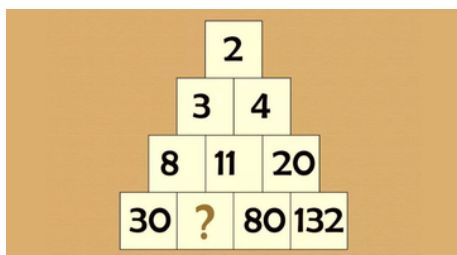

FUN WITH MATHS

MISSING NUMBER :

COUNT THE SHAPES:

99. Find the number of triangles in the given figure :

(A) 12

(B) 18

(C) 22

(D) 26

NUMBER DETECTIVE:

RIDDLE!

- 1 I am a 3-digit number.
- 2 The sum of my digits is 15.
- 3 My hundreds digit and ones digit are the same.
- 4 My tens digit is 3 more than my ones digit.

WHAT NUMBER AM I?

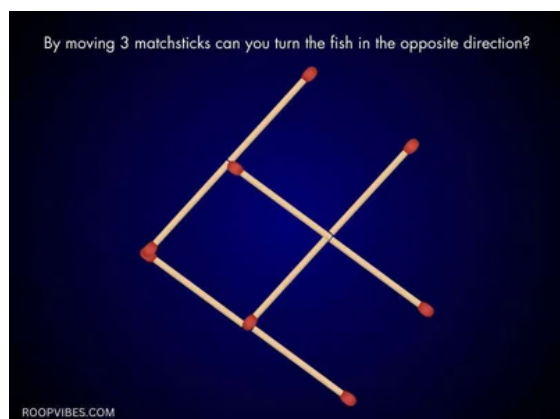

AGE PUZZLE :

SMART

If the age of a person today is three times the age of their sibling 10 years ago, and in 5 years the person will be twice as old as their sibling, what are their ages now?

MATCHSTICK PUZZLE :

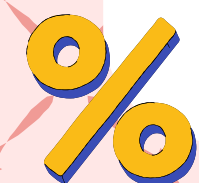

LOGIC PUZZLE :

Logic Puzzle

Pat has 9 gold coins weighing 1g, 2g, ..., 9g. He wants to divide these amongst his 3 children so that each gets the same amount of gold in grams. Can you help him?

Mahatma Gandhi:A Life Of Truth

A special tribute

Gandhi Jayanti

Every 2nd October is celebrated as Gandhi Jayanti. The Father of the Nation, Mohandas Karamchand Gandhi, was born on this date. This day is celebrated as his birthday and is also declared as national holiday. He is called the Father of the Nation because of his tireless efforts to free India from the British following the satyagraha.

In South Africa, the foundational event of his life- being thrown off a train for refusing to move on to the non-European carriage -ignited his passion for justice. He practised satyagraha ("Truth force or "Soul force ") as a powerful force.

Another iconic movement was in 1930 Salt March to Dandi which symbolized India's self-rule .

Legacy and Principles

His unwavering commitment to Truth (Satya) and Non-violence (Ahimsa) continues to inspire movements for civil rights and freedom worldwide .He taught that ends do not justify means, and true freedom is inner and collective peace.

*Let his principles
guide us: Truth,
Non-Violence,
Love for All.*

"Let us pledge to follow the path of truth, non-violence, and simplicity today and always".

"Have a meaningful Gandhi Jayanti!

LINGUISTIC LOUNGE

BENGALI

বাঙালি

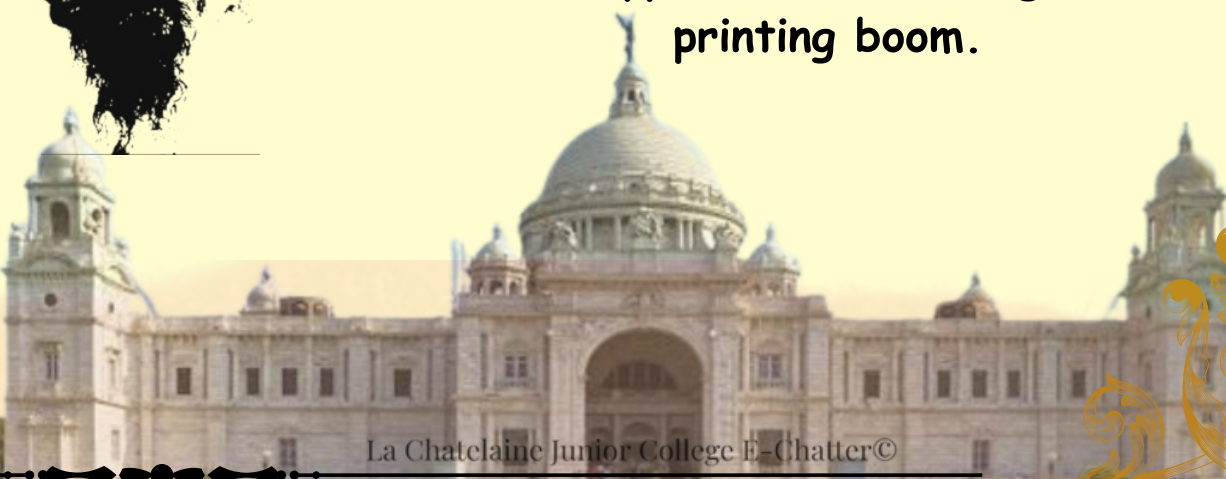

★ Ancient Evolution: Bengali developed over 1,400 years from Sanskrit and Magadhi Prakrit dialects, emerging into its distinct linguistic form around the 10th to 12th centuries.

★ Sacred Sacrifice: It is the only language in history for which people laid down their lives; the historic 1952 Language Movement in Bangladesh directly inspired UNESCO to create International Mother Language Day.

★ Global Footprint: With over 230 million speakers, it is the second most spoken language in India, the seventh most spoken language globally, and holds honorary official status in the African nation of Sierra Leone.

★ Typography Revolution: The cursive Bengali script dropped old, overly complex handwritten loops in 1778 when a local blacksmith carved the first metal typefaces, launching Asia's early printing boom.

THE ACCIDENTAL DISCOVERY OF COCA COLA

A simple mistake ,a famous drink!

1.Before

In the late 1800s, John Pemberton a pharmacist from Atlanta, Georgia was working on a medicine .He wanted to create a tonic that could help with headaches , stomach problems and nervousness.

2.The Accident

While working in his laboratory , Pemberton accidentally mixed different ingredients in a new formulation .The result was unique,bitter syrup -not what he had planned .

John S. Pemberton
(1831-1888)
Pharmacist / Inventor

3.Discovery

Instead of throwing it away , Pemberton thought the new mixture tasted good.He decided to add carbonated water,sugar and other natural flavours.That surprising combination created a refreshing and delicious drink -which he named Coca-Cola .

4.Impact

In 1886, Pemberton sold the rights to his invention ,and Coca Cola become a commercial product.It quickly gained popularity and spread across the world .Today Coca Cola is one of the most recognised and loved brands in the world, enjoyed in 200 countries.

STUDENT CHRONICLES

MY BEAUTIFUL SUMMER VACATION

My summer vacation began in the month of May. It was so exciting. I couldn't wait. We went to our village to see my grandpa, sister, brother, uncle and aunties.

My first journey began in the train. I looked out of the window and ate snacks and dinner. I even slept in the train. As soon as we reached our village, everyone in the village welcomed us. After that we ate our breakfast. It was so yummy.

We played with my cousins, and then we set out on our journey to Tenkasi Vallam village. I met my aunt and my cousin, then we went to Kuttralam, Aintharuvi and Peraruvi. I was a bit scared but enjoyed it.

I loved going to Tenkasi temple. There I saw Lord Shiva. I loved my vacation.

Thank you.

STUDENT CHRONICLES

HOW I BECAME BRAVE

To me, being brave means trying something even when I feel a little scared. Lately, I started learning boxing, and it has really helped me become braver. In the beginning, I was nervous about stepping into the ring and learning new moves, but I realised that being brave is not about being fearless, it is about trying hard, even when my heart is racing.

Every time I practise a punch or face a challenge in training, I feel my confidence grow. Boxing has taught me that I take a deep breath and stay focused, and I am amazed that I can do things that I once thought were too hard.

Now I carry some “brave” feeling with me to school and even to other places I go to. Being brave is like a superpower that gets stronger every time I step into the ring.

I truly wish for all my friends to participate in at least one sport. Sports are so helpful because they teach us discipline, hard work and how to stay focused.

So, pick a sport, give it a try, and see how much you can accomplish!!!

THE CLOCK THAT HAD STOPPED

Ria was in fourth standard. In her house, there was a clock which was quite old.

But for almost 10 years, it had stopped working. No one could fix it.

One day, Ria's grandfather said, "This clock will start only when someone finds the lost key inside the house."

Ria started searching. She looked under the bed, inside books, behind curtains even.. but found nothing...

Then, she got an idea. She sat quietly and listened to the another clock which was ticking by softly. She heard a very soft sound - tick.. tick..

She opened the small back door of the clock.. Inside, she expected to find the key, but there was none there. But there was a folded paper. And, on the paper was written - "The key is not made of iron. The key is just love and care.."

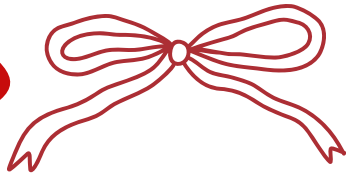

Ria understood. All of that day, she cleaned the clock, and she did this everyday.. She put oil and wiped away the dust with love. After a week, the clock started to work again. "Tick - tock!" Everyone in the house was so happy and even shocked. Grandfather hugged Ria and said, "You found the real key!!!"

Moral: Love and care can fix everything
